Dear HGF members and Newsletter readers,

There are some exciting activities in front of our association. First of all, we will have our next **virtual workshop on April 27 (from 15:00-16:30) and April 28 (from 14:30-16:30)**. Please block your agenda for this upcoming HGF workshop.

Furthermore, we aim to organize our Autumn workshop in connection with the [8th International Conference on Dietary Fibre 2022](#) at KU Leuven (Belgium) from October 16-18.

HGF Online Spring Workshop - April 2022

The full program of the virtual spring workshop will be soon published on the HGF website. To tease a little bit, in the afternoon of Wednesday April 27, several speakers are invited to provide more backgrounds on OPEN INNOVATION. The speakers will give some examples on start-ups and disruptive ideas in the cereal area. In the afternoon of Thursday April 28, this will be followed by several speakers that touch upon a better understanding of the protein transition, where cereals may well play an important role in the near future.

HealthFerm Project

The consortium of the HealthFerm project has received very good news from the European Union. The proposal has received a very good score and has been granted. The project is now in its phase of starting up. The project aims to be started either in June or September this year. HGF is involved in the dissemination of the project results (WP6).

Of course, we keep asking your input on HGF activities to the Board members you can easily contact. Please, share your ideas and thoughts.

On behalf of the HGF Board

Nesli Sözer

Jan de Vries
